

Workplace Assessments

On-site/On the job

- Assessment is carried out on-site and on the job to minimise disruptions to the workplace. Remote areas are our speciality. We go everywhere.
- We can use company assessment instruments to ensure that the assessment is carried out to comply with company/site/client requirements.
- We can design assessment instruments to meet all company and site or job specific requirements. These can be aligned to National Competencies and all Training Packages.

Assessment Validations

TRACMIN can give an independent and impartial assessment of your company's personnel and/or contractors' operators.

Aligned with NATIONAL competencies

All assessments are written to meet company needs and are aligned to the latest National Competencies from the new Metalliferous Mining, Drilling, Extractive Industries and Transport Training Packages

Accredited assessors

All TRACMIN trainers are experienced and Accredited Workplace Assessors. We also provide professional development for your in-house trainers and assessors.

Surface and Underground

TRACMIN can carry out and validate assessments on all surface and underground personnel, to new Metalliferous Mining and Extractive Industries Competency Standards.
